

Chem 11 F-21 Student comments

TM: Overall I really enjoyed the labs and each one was a good lab in it's own way!

AC: Overall, however, I had a great semester and I am glad to have checked this class off of my list!

TG: Overall this was a really fun course. :)

TJ: Overall, I really enjoyed the class

BL: Overall, I liked most of the labs and gained a substantial amount of valuable information from them.

KS: I enjoyed doing these experiments.

HT: Overall the class was very fun.

AW: I was a bit concerned when i signed up for a lab class from home. Once I started to do the assignments I realized that this was pretty neat.

DJ

I must say that this class was a bit intimidating and that it challenged me to push beyond my comfort zone. With that said, I want to say that I thoroughly enjoyed all the experiments. Professor Gottlieb, I want to say thank you for a great semester! Thank you for the hard work you put into your class. I thoroughly enjoyed having you as our instructor.

AB

All in all I enjoyed the experiments and would recommend anyone considering to take this class, to do so.

A special thank you for being such an excellent instructor, and for the valuable experience I gained. In addition, I would also like to thank you for your kindness and patience during my illness. I feel so fortunate that I had the privilege to be in your classes this summer.

This class made chemistry interesting.

MN

Overall, the experiments were informative. I can't say that chemistry is a strength of mine, but this class made it interesting and educated me on the world around us. I am appreciative of our instructor's patience.

CR

All in all, I really enjoyed this class. Also, the clam shells were great. No doubt, a lot of work went into assembling them, and the scale, thermometer, and goggles were much appreciated. I felt very "set up for success" by Cliff

HL

I am also not a science person, AT ALL, but this class pushed me to do some really cool things.

AF

I enjoyed this class very much.

MP

...very informative and fun
